

# Infinite Campus Security

It is imperative that you utilize a strong password for your Infinite Campus (IC) account. Using a strong password helps to prevent intrusions into the system via your account. There will be attempts by individuals to “hack” into your account in order to perform unscrupulous actions, (i.e. change grades, and steal personal information).

A strong password consists of letters, numbers, and symbols. You are forced to use a strong password to prevent such an occurrence of “hacking” your account. An example of a strong password would be “b@seba11”. Your password must contain at least 8 characters.

You may change your password easily by doing the following:

Log into IC

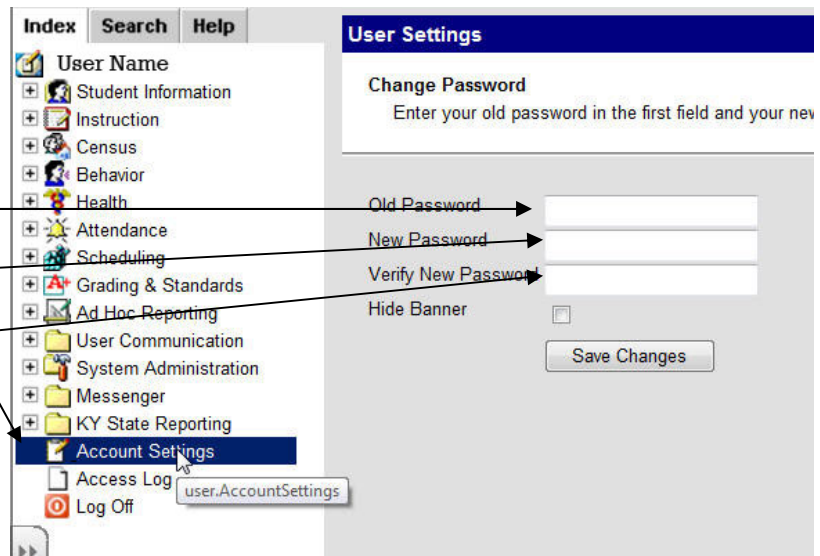

Click “Account Settings”

Type your old password

Type your new password

Retype your new password

Click “Save Changes”

From this point forward you will use the newly created password.

You will see changes in the very near future concerning your district network account concerning utilization of passwords as well. You will receive instructions concerning this soon.
